

### VELOCITY OF AIRFLOW

All ventilation range hoods require ducts to channel vapors and odors emitted during cooking – from indoors to outdoors. However, ducting causes static pressure build-up that in turn reduces the fan's ventilation flow. Fujioh has developed a range hood which can maintain stronger ventilation at 285 CFM for a 10-foot rectangular duct and 275 CFM for a 50-foot rectangular duct.

### HOW TO READ PERFORMANCE DATA

Judging from actual test performances of models FSR-3000, FSR-3600 and FSR-4200, where a duct was connected to the range hood and a vend cup was attached to the outer wall, the exhaust capability of cooking fumes was reduced. The performance curve shows the correlation between the discharging airflow and the resistance of discharge. The higher the "Pa", the better the product.

### 3-YEAR LIMITED WARRANTY

Fujioh's 3-year limited warranty gives you added assurance and peace of mind that other brands don't. Every Fujioh range hood is built to strict and exact specifications to give you the very best for the years to come.

### ISO 9001 CERTIFICATION

In 1995, we were awarded the ISO-9001 certificate for our production systems, quality control, design and service. It's a mark of our promise to deliver quality products to our customers and to constantly provide products that offer a better quality of life and peace of mind.

### QUALITY ASSURED FOR OPTIMUM PERFORMANCE

Fujioh range hoods have surpassed Japan's highest test standards year after year. Millions of satisfied customers are proof of our outstanding quality and performance.

Designed for customers in U.S.A. Manufactured in Japan.

FSR series

# THE FUJIOH ADVANTAGE – RSF™ TECHNOLOGY THAT DELIVERS

At Fujioh, we don't just build range hoods. We create technologically advanced hoods that improve your cooking experience. One of the first things you'll notice with a Fujioh range hood is that it's quiet. So quiet that you hardly notice it at all, even though it's hard at work clearing the air of smoke and odors. That's **RSF™ technology** at work – the revolutionary **Rectifier Baffle Panel** that pulls in smoke from every direction, the unique **Silicon Coated Filter** that resists oily build-ups, and the state-of-the-art **Fujioh Turbo Fan** that keeps noise at a minimum. The result – less clean-up. Not to mention, every Fujioh range hood comes with a 3-year limited warranty for the added assurance you want.

## FUJIOH TURBO FAN – FOR LESS NOISE

Turn on the Fujioh range hood and you'll love the fact that it's quiet. Thanks to the state-of-the-art centrifugal Fujioh Turbo Fan which is ideal for use with a ventilating duct, the fan's stronger discharging power keeps the air clear of smoke and odors while reducing excess vibration and noise.

## DUAL SLOTS – FOR MORE VENTILATION

Besides the main ventilation system, the Fujioh range hood comes equipped with two supplementary Dual Slot ducts which pull in overflowing smoke or odors. So you can be sure of a more comfortable cooking experience.

## OIL CATCH TRAY – FOR LESS OIL AND LESS MESS

Designed to work with the Silicon Coated Filter, the Oil Catch Tray collects oils and fats emitted during cooking. Even better, it only needs to be drained periodically.

## SILICON COATED ALUMINUM FILTER – FOR EASY CLEANING

The removable Silicon Coated Filter has a unique oil-repelling silicon coating that's easy to clean, and actually resists oil and fat build-up. That's because the oil turns into droplets which can be easily wiped away with a detergent-soaked cleaning cloth.

## RECTIFIER BAFFLE PANEL – FOR A BREATH OF FRESH AIR

At the heart of the Fujioh range hood lies the revolutionary Rectifier Baffle Panel – a technological marvel that can gather two and a half times more smoke, cooking vapors and other odors than conventional hoods. Amazingly powerful, it pulls in smoke from virtually every direction, so you can always be sure of an odor-free cooking environment, non-greasy working surfaces and floors that require little cleaning.

## HALOGENA LIGHTS – FOR BRIGHTER LIGHTING

The range hood comes with 2 bulb sockets that let you install optional HALOGENA light bulbs should you want brighter lighting.

FSR SERIES IS AVAILABLE IN 3 MODELS

MODEL FSR – 3000  
30-inch width

MODEL FSR – 3600  
36-inch width
